

#### ACADSB Antibody (C-term) Blocking Peptide Synthetic peptide

Catalog # BP8537b

### Specification

# ACADSB Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

<u>P45954</u>

# ACADSB Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 36

#### **Other Names**

Short/branched chain specific acyl-CoA dehydrogenase, mitochondrial, SBCAD, 2-methyl branched chain acyl-CoA dehydrogenase, 2-MEBCAD, 2-methylbutyryl-coenzyme A dehydrogenase, 2-methylbutyryl-CoA dehydrogenase, ACADSB

### Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/products/AP8537b>AP8537b</a> was selected from the C-term region of human ACADSB. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# ACADSB Antibody (C-term) Blocking Peptide - Protein Information

### Name ACADSB (<u>HGNC:91</u>)

#### Function

Short and branched chain specific acyl-CoA dehydrogenase that catalyzes the removal of one hydrogen from C-2 and C-3 of the fatty acyl-CoA thioester, resulting in the formation of trans-2-enoyl-CoA (PubMed:<a href="http://www.uniprot.org/citations/7698750" target="\_blank">7698750</a>, PubMed:<a href="http://www.uniprot.org/citations/11013134" target="\_blank">7698750</a>, PubMed:<a href="http://www.uniprot.org/citations/11013134" target="\_blank">11013134</a>, PubMed:<a href="http://www.uniprot.org/citations/21430231" target="\_blank">21430231</a>, PubMed:<a href="http://www.uniprot.org/citations/10832746" target="\_blank">10832746</a>). Among the different mitochondrial acyl-CoA dehydrogenases, acts specifically on short and branched chain acyl-CoA derivatives such as (S)-2-methylbutyryl-CoA as well as short straight chain acyl-CoAs such as butyryl-CoA (PubMed:<a href="http://www.uniprot.org/citations/7698750" target="\_blank">7698750</a>, PubMed:<a href="http://www.uniprot.org/citations/10832746" target="\_blank">10832746</a>). Among the different mitochondrial acyl-CoA dehydrogenases, acts specifically on short and branched chain acyl-CoA derivatives such as (S)-2-methylbutyryl-CoA as well as short straight chain acyl-CoAs such as butyryl-CoA (PubMed:<a href="http://www.uniprot.org/citations/7698750" target=" blank">7698750</a>, PubMed:<a href="http://www.uniprot.org/citations/7698750</a>

href="http://www.uniprot.org/citations/11013134" target="\_blank">11013134</a>, PubMed:<a
href="http://www.uniprot.org/citations/21430231" target="\_blank">21430231</a>, PubMed:<a
href="http://www.uniprot.org/citations/10832746" target="\_blank">10832746</a>). Plays an
important role in the metabolism of L- isoleucine by catalyzing the dehydrogenation of
2-methylbutyryl-CoA, one of the steps of the L-isoleucine catabolic pathway (PubMed:<a
href="http://www.uniprot.org/citations/10832746" target="\_blank">11013134</a>, PubMed:<a
href="http://www.uniprot.org/citations/1013134" target="\_blank">10832746</a>). Can also act
on valproyl-CoA, a metabolite of valproic acid, an antiepileptic drug (PubMed:<a
href="http://www.uniprot.org/citations/10832746" target="\_blank">10832746</a>). Can also act
on valproyl-CoA, a metabolite of valproic acid, an antiepileptic drug (PubMed:<a
href="http://www.uniprot.org/citations/8660691" target="\_blank">8660691</a>).

Cellular Location Mitochondrion matrix

**Tissue Location** Ubiquitously expressed.

# ACADSB Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

#### • <u>Blocking Peptides</u> ACADSB Antibody (C-term) Blocking Peptide - Images

# ACADSB Antibody (C-term) Blocking Peptide - Background

ACADSB has greatest activity toward short branched chain acyl-CoA derivative such as (s)-2-methylbutyryl-CoA, isobutyryl-CoA, and 2-methylhexanoyl-CoA as well as toward short straight chain acyl-CoAs such as butyryl-CoA and hexanoyl-CoA. This protein can use valproyl-CoA as substrate and may play a role in controlling the metabolic flux of valproic acid in the development of toxicity of this agent.
