

**ZMYND11 Antibody (N-term) Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP8592a****Specification**

---

**ZMYND11 Antibody (N-term) Blocking Peptide - Product Information**Primary Accession [Q15326](#)**ZMYND11 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 10771**Other Names**

Zinc finger MYND domain-containing protein 11, Adenovirus 5 E1A-binding protein, Bone morphogenetic protein receptor-associated molecule 1, Protein BS69, ZMYND11, BRAM1, BS69

**Target/Specificity**

The synthetic peptide sequence used to generate the antibody [AP8592a](/products/AP8592a) was selected from the N-term region of human ZMYND11. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**ZMYND11 Antibody (N-term) Blocking Peptide - Protein Information****Name** ZMYND11 ([HGNC:16966](#))**Function**

Chromatin reader that specifically recognizes and binds histone H3.3 trimethylated at 'Lys-36' (H3.3K36me3) and regulates RNA polymerase II elongation. Does not bind other histone H3 subtypes (H3.1 or H3.2) (By similarity). Colocalizes with highly expressed genes and functions as a transcription corepressor by modulating RNA polymerase II at the elongation stage. Binds non-specifically to dsDNA (PubMed:<http://www.uniprot.org/citations/24675531> target="\_blank">24675531</a>). Acts as a tumor-suppressor by repressing a transcriptional program essential for tumor cell growth.

**Cellular Location**

Nucleus. Chromosome Note=Associates with chromatin and mitotic chromosomes

**Tissue Location**

Ubiquitous..

**ZMYND11 Antibody (N-term) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**ZMYND11 Antibody (N-term) Blocking Peptide - Images****ZMYND11 Antibody (N-term) Blocking Peptide - Background**

ZMYND11 is first identified by its ability to bind the adenovirus E1A protein. The protein localizes to the nucleus. It functions as a transcriptional repressor, and expression of E1A inhibits this repression.
