

#### AIFM3 Antibody (C-term) Blocking Peptide Synthetic peptide

Catalog # BP9174b

## Specification

# AIFM3 Antibody (C-term) Blocking Peptide - Product Information

**Primary Accession** 

### <u>Q96NN9</u>

## AIFM3 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 150209

**Other Names** Apoptosis-inducing factor 3, 1---, Apoptosis-inducing factor-like protein, AIFM3, AIFL

### Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/products/AP9174b>AP9174b</a> was selected from the C-term region of human AIFM3. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage** Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

### **Precautions** This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## AIFM3 Antibody (C-term) Blocking Peptide - Protein Information

Name AIFM3

Synonyms AIFL

Function

Induces apoptosis through a caspase dependent pathway. Reduces mitochondrial membrane potential.

**Cellular Location** 

Mitochondrion. Note=Does not translocate to the nucleus upon induction of apoptosis

### **Tissue Location**

Ubiquitous. Expressed in bone marrow, cerebral cortex, liver, ovary, thymus, thyroid gland and tongue (at protein level).

## AIFM3 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### AIFM3 Antibody (C-term) Blocking Peptide - Background

This protein encodes a tumor suppressor that is involved in transcriptional and post-transcriptional control pathways. The protein is a component of the the PAF protein complex, which associates with the RNA polymerase II subunit POLR2A and with a histone methyltransferase complex. This protein appears to facilitate the association of 3' mRNA processing factors with actively-transcribed chromatin. Mutations in this gene have been linked to hyperparathyroidism-jaw tumor syndrome, familial isolated hyperparathyroidism, and parathyroid carcinoma.
