HSB11 Antibody (C-term) Blocking Peptide

Synthetic peptide
Catalog # BP9422b

Specification

HSB11 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession Q9Y547

HSB11 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 51668

Other Names
Intraflagellar transport protein 25 homolog, Heat shock protein beta-11, Hspb11, Placental protein 25, PP25, HSPB11, C1orf41, IFT25

Format
Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions
This product is for research use only. Not for use in diagnostic or therapeutic procedures.

HSB11 Antibody (C-term) Blocking Peptide - Protein Information

Name IFT25 (HGNC:25019)

Synonyms C1orf41, HSPB11

Function
Component of the IFT complex B required for sonic hedgehog/SHH signaling. May mediate transport of SHH components: required for the export of SMO and PTCH1 receptors out of the cilium and the accumulation of GLI2 at the ciliary tip in response to activation of the SHH pathway, suggesting it is involved in the dynamic transport of SHH signaling molecules within the cilium. Not required for ciliary assembly. Its role in intraflagellar transport is mainly seen in tissues rich in ciliated cells such as kidney and testis. Essential for male fertility, spermiogenesis and sperm flagella formation. Plays a role in the early development of the kidney. May be involved in the regulation of ureteric bud initiation (By similarity).

Cellular Location
Cell projection, cilium {ECO:0000250|UniProtKB:Q9D6H2}

Tissue Location
Detected in placenta..
