C11orf30 Antibody (N-term) Blocking Peptide - Protein Information

Name EMSY (HGNC:18071)

Synonyms C11orf30

Function

Regulator which is able to repress transcription, possibly via its interaction with a multiprotein chromatin remodeling complex that modifies the chromatin (PubMed:14651845). Its interaction with BRCA2 suggests that it may play a central role in the DNA repair function of BRCA2 (PubMed:14651845). Mediates ligand-dependent transcriptional activation by nuclear hormone receptors (PubMed:19131338).

Cellular Location

Nucleus. Note=Localizes to DNA damage markers in irradiated cells, suggesting that it participates in DNA repair process
