

Myc Tag Antibody Blocking Peptide
Synthetic peptide
Catalog # MP1007a**Specification**

Myc Tag Antibody Blocking Peptide - Product Information**Myc Tag Antibody Blocking Peptide - Additional Information****Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Myc Tag Antibody Blocking Peptide - Protein Information**Myc Tag Antibody Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

Myc Tag Antibody Blocking Peptide - Images**Myc Tag Antibody Blocking Peptide - Background**

Epitope tags consisting of short sequences recognized by well-characterized monoclonal antibodies have been widely used in the study of protein expression in various systems. The HA tag (YPYDVPDYA) and Myc Tag (AEEQKLISEEDLLRKRREQLKHKLE), recognized by monoclonal antibody clones 12CA5 and 9E10, respectively, are illustrative examples. Abgent's anti-Myc monoclonal antibody (Clone 9E10) provides a simple solution to detect the expression of a Myc-tagged protein in cells.
