

## **Recombinant Murine FGF-9**

Catalog # PBG10104

# Specification

### Recombinant Murine FGF-9 - Product Information

# **Recombinant Murine FGF-9 - Additional Information**

## **Description**

FGF-9 is a heparin binding growth factor that belongs to the FGF family. Proteins of this family play a central role during prenatal development and postnatal growth and regeneration of a variety of tissues, by promoting cellular proliferation and differentiation. FGF-9 targets glial cells, astrocytes cells and other cells that express the FGFR 1c, 2c, 3b, 3c, and 4. Recombinant murine FGF-9 is a 23.3 kDa protein containing 205 amino acid residues.

## **Biological**Activity

The <strong>ED</strong><sub>50</sub> as determined by the dose-dependent stimulation of thymidine uptake by BaF3 cells expressing FGF receptors is  $\leq 0.5$  ng/ml, corresponding to a specific activity of  $\geq 2 \times 10$ <sup>6</sup> units/mg.

## **Authenticity**

Verified by N-terminal and Mass Spectrometry analyses (when applicable).

### **Endotoxin**

Endotoxin level is  $<0.1 \text{ ng}/\mu\text{g}$  of protein ( $<1\text{EU}/\mu\text{g}$ ).

### **Protein Content**

Verified by UV Spectroscopy and/or SDS-PAGE gel.

### Storage

-20°C

### **Precautions**

Recombinant Murine FGF-9 is for research use only and not for use in diagnostic or therapeutic procedures.

# **Recombinant Murine FGF-9 - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
