

Recombinant Human MCP-1 (CCL2)

Catalog # PBG10281

## Specification

Recombinant Human MCP-1 (CCL2) - Product Information

# **Recombinant Human MCP-1 (CCL2) - Additional Information**

Description

The MCP proteins belong to the CC chemokine family, and signal through CCR2 and, with the exception of MCP-1, other CCR receptors. The MCP proteins chemoattract and activate monocytes, activated T cells, basophils, NK cells, and immature dendritic cells. The MCP family cross reacts across species. Recombinant human MCP-1 is an 8.6 kDa protein containing 76 amino acid residues including the four highly conserved cysteine residues present in the CC chemokines.

### BiologicalActivity

Determined by its ability to chemoattract human monocytes using a concentration range of 10.0-100.0 ng/ml.

Authenticity Verified by N-terminal and Mass Spectrometry analyses (when applicable).

Endotoxin Endotoxin level is <0.1 ng/  $\mu$ g of protein (<1EU/  $\mu$ g).

# **Protein Content**

Verified by UV Spectroscopy and/or SDS-PAGE gel.

Storage -20°C

**Precautions** Recombinant Human MCP-1 (CCL2) is for research use only and not for use in diagnostic or therapeutic procedures.

# Recombinant Human MCP-1 (CCL2) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- <u>Dot Blot</u>
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
