

C5a (His-Tag), murine recombinant protein

Complement Fragments C5a
Catalog # PBV10468r

Specification

C5a (His-Tag), murine recombinant protein - Product info

Primary Accession P06684
Calculated MW 9 kDa KDa

C5a (His-Tag), murine recombinant protein - Additional Info

Gene ID 15139
Gene Symbol C5a

Other Names

Complement Fragments C5a, C5a anaphylatoxin chemotactic receptor

Gene Source Mouse Source E. coli

Assay&Purity SDS-PAGE; ≥95%

Assay2&Purity2 HPLC;
Recombinant Yes

Results 1-3 nmolar

Application Notes

Reconstitute to a concentration of 1.0 mg/ml in ice-cold H_2O containing 2.5 mg/ml BSA. The solution should be aliquoted and immediately stored at -70°C.

Format

Lyophilized protein

Storage

-20°C; Sterile filtered and lyophilized with no additives

C5a (His-Tag), murine recombinant protein - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Mouse complement C5a is a 77-amino acid peptide generated during complement activation from the α -chain of complement C5. Mouse C5a shares 60% and 82% amino acid sequence identity to human and rat C5a, respectively. C5a binds to a signaling G-protein coupled receptor (GPCR) (C5aR/CD88), inducing neutrophil chemotaxis and endothelial cell activation. It also triggers an oxidative burst in macrophages and neutrophils, and induces release of histamine in basophils and mast cells. The 9 kDa mouse C5a protein expressed in E. coli contains a N-terminal His-Tag sequence.
