

Isorbin (Fixed and killed *S. aureus* Protein A positive strain) recombinant protein
Isorbin™ (Fixed and killed *S. aureus* Protein A positive strain)
Catalog # PBV10725r

Specification

**Isorbin (Fixed and killed *S. aureus* Protein A positive strain) recombinant protein -
Product info**

**Isorbin (Fixed and killed *S. aureus* Protein A positive strain) recombinant protein -
Additional Info**

Other Names

Isorbin™ (Fixed and killed *S. aureus* Protein A positive strain)

Assay&Purity
Assay2&Purity2

**SDS-PAGE;
HPLC;**

Application Notes

Reconstitute with 20 ml (100 ml or 1 L) of distilled H₂O before use. The product will give a 10% (v/v) suspension of fixed and killed *Staphylococcus aureus*, Cowan I strain, in 10 mM phosphate buffered saline, pH 7.4 containing 0.05% thimerosal as preservative

Format

Lyophilized

Storage

-20°C; Lyophilized powder

**Isorbin (Fixed and killed *S. aureus* Protein A positive strain) recombinant protein -
Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Isorbin (Fixed and killed *S. aureus* Protein A positive strain) recombinant protein - Images

**Isorbin (Fixed and killed *S. aureus* Protein A positive strain) recombinant protein -
Background**

The strong cell wall of *S. aureus* Protein A strain provides an excellent anchor for active Protein A molecules. After fix and kill, the cells become fine solid particles with active protein A molecules on it. The protein A particles can be used in absorbance and purification of monoclonal and polyclonal

antibodies, and immobilizing antibody in immunoprecipitation and co-immunoprecipitation assays.
