

#### Protein G recombinant protein

Protein G Catalog # PBV10727r

# **Specification**

### **Protein G recombinant protein - Product info**

Primary Accession CAA27638
Calculated MW 26.1 kDa KDa

# **Protein G recombinant protein - Additional Info**

Other Names Protein G

Gene Source Streptococcus sp Source E. coli

Assay&Purity
SDS-PAGE; ≥98%
Assay2&Purity2
HPLC; ≥98%

Recombinant Yes

**Application Notes** 

Reconstitution in H<sub>2</sub>O to a concentration of 5 mg/ml gives a clear solution.

Format Lyophilized

Storage

-20°C; Lyophilized with no additives

# **Protein G recombinant protein - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

#### Protein G recombinant protein - Background

Protein G binds to the constant region of many species of immunoglobulin G. Protein G can be used to detect, quantify and purify IgG antibodies and antibody/antigen complexes. BioVision's Recombinant Protein G contains only IgG binding domains. The albumin-binding domain as well as cell wall and cell membrane binding domains have been removed to ensure the maximum specific

IgG binding capacity. The 6-His-tag on N-terminus can be used for affinity purification or protein G detection using anti-His-tag antibodies.

Protein G binds to all IgG subclasses from human, mouse and rat species. It also binds to total IgG from guinea pig, rabbit, goat, cow, sheep, and horse.
