CD300C, human recombinant protein - Background

CMRF35-like molecule 6, also known as CD300C, belongs to the CD300 family. The CMRF35 antigen, which was identified by reactivity with a monoclonal antibody, is present on monocytes, neutrophils, and some T and B lymphocytes. Recombinant human CD300C protein, fused to His-tag at N-terminus, was expressed in E.coli.
