

Human CellExp IL20RB /IL-20R2, human recombinant protein IL20RB, IL-20R2, IL-20R-beta, DIRS1, FNDC6 Catalog # PBV11068r

### **Specification**

## Human CellExp IL20RB /IL-20R2, human recombinant protein - Product info

Primary Accession Calculated MW

#### <u>Q6UXL0</u>

53833

IL20RB

This protein fused with Fc fragment of human IgG1 at the C-terminus, has a calculated MW of 49.1 kDa. The predicted N-terminus is Asp 30. As a result of glycosylation, DTT-reduced Protein migrates as 50 kDa and non-reduced protein migrates as 100 kDa. KDa

### Human CellExp IL20RB /IL-20R2, human recombinant protein - Additional Info

Gene ID Gene Symbol **Other Names** IL20RB, IL-20R2, IL-20R-beta, DIRS1, FNDC6

Gene Source Source Assay&Purity Assay2&Purity2 Recombinant Results Human HEK293 cells SDS-PAGE; ≥90% N/A; Yes Measured by its binding ability in a functional ELISA. When Recombinant Human IL-19 protein is present at 0.2 µg/mL, the concentration of rhIL20RB Fc Chimera that produces 50% of the optimal binding response is approximately 5-50 ng/ml.

Target/Specificity IL20RB /IL-20R2

**Application Notes** 

Centrifuge the vial prior to opening. Reconstitute in sterile PBS, pH 7.4 to a concentration of 50  $\mu$ g/ml. Do not vortex. This solution can be stored at 2-8°C for up to 1 month. For extended storage, it is recommended to store at -20°C.

Format Lyophilized

Storage

-20°C; Lyophilized from 0.22 μm filtered solution in 50 mM tris, 100 mM glycine, pH 7.0. Normally Mannitol or Trehalose is added as protectants before lyophilization.

# Human CellExp IL20RB /IL-20R2, human recombinant protein - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# Human CellExp IL20RB /IL-20R2, human recombinant protein - Background

Interleukin-20 receptor subunit beta (IL20RB) is also known as IL-20R2, DIRS1, which belongs to the type II cytokine receptor family. IL20RB / IL-20R2 contains two fibronectin type-III domains. IL20RB / IL-20R2 is widely expressed with highest levels in skin and testis. IL20RB can be fused with IL20RA or IL22RA1 forming heterodimer. The IL20RA/IL20RB dimer is a receptor for IL19, IL20 and IL24. The IL22RA1/IL20RB dimer is a receptor for IL20 and IL24.
