

Cathepsin F, human recombinant

CATSF, CLN13, CTSF Catalog # PBV11476r

Specification

Cathepsin F, human recombinant - Product info

Primary Accession NP_003784
Concentration 1 mg/ml

Calculated MW This protein is fused with a 6× His tag at

N-terminus and has a calculated MW of 26

kDa. KDa

Cathepsin F, human recombinant - Additional Info

Other Names CATSF, CLN13, CTSF

Gene Source Human Source E. coli

Assay&Purity SDS-PAGE;≥90%

Assay2&Purity2 N/A;≥90%

Target/Specificity

CTSF

Application Notes

In 20mM Tris-HCl buffer (pH 8.0) containing 0.4M Urea,

Format

Liquid

Storage

-20°C;Liquid

Cathepsin F, human recombinant - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Western Blot

Tel: 858.875.1900 Fax: 858.875.1999

- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>

Cathepsin F, human recombinant - Background

Cathepsin F, also known as CTSF, belongs to the cathepsin family. Cathepsins are papain family cysteine proteinases that represent a major component of the lysosomal proteolytic system. The CTSF gene is

ubiquitously expressed, and it maps to chromosome 11q13, close to the gene encoding cathepsin W. CTSF is

thought to play a role in normal protein catabolism, and because it is highly expressed in some cancer cell lines, it

may be involved in degradative processes occurring during tumor progression. Recombinant human CTSF protein,

fused to His-tag at N-terminus, was expressed in E.coli.
