

Human CellExp™ CD45, human recombinant
LCA; LY5; B220; T200; CD45R; GP180; PTPRC
Catalog # PBV11492r**Specification**

Human CellExp™ CD45, human recombinant - Product info

Primary Accession [P08575](#)
Calculated MW **65kDa KDa**

Human CellExp™ CD45, human recombinant - Additional Info

Gene ID **5788**
Other Names
LCA; LY5; B220; T200; CD45R; GP180; PTPRC

Gene Source **Human**
Source **HEK 293 cells**
Assay&Purity **SDS-PAGE; ≥ 98%**
Recombinant **Yes**
Target/Specificity
PTPRC

Application Notes

Reconstitute in 1X PBS to the desired protein concentration.

Format

Lyophilized

Storage

-20°C; Lyophilized from 0.2 µm-filtered solution in PBS.

Human CellExp™ CD45, human recombinant - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

Human CellExp™ CD45, human recombinant - Images**Human CellExp™ CD45, human recombinant - Background**

Protein tyrosine phosphatase, receptor type C (CD45), also known as PTPRC is a member of the

protein tyrosine phosphatase (PTP) family which is known for its function to serve as signaling molecules and to regulate a variety of cellular processes such as cell proliferation, differentiation, mitotic cycle and oncogenic transformation. CD45 is found expression specifically in hemotopietic cells. CD45 consists of an extracellular domain, a single transmembrane segment and two tandem intracytoplasmic catalytic domains. It serves as an essential regulator of T-cell and B-cell antigen receptor signaling through either direct interaction with components of the antigen receptor complexes or by activating various Src family kinases required for the antigen receptor signaling and it also can suppress JAK kinases.
