Flow Cytometry Perm Buffer (10X)

Catalog # RTB10051

Specification

Flow Cytometry Perm Buffer (10X) - Product Information

Application	FC

Flow Cytometry Perm Buffer (10X) - Additional Information

Flow Cytometry Perm Buffer (10X) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Flow Cytometry Perm Buffer (10X) - Images

Flow Cytometry Perm Buffer (10X) - Background

Tonbo Biosciences Flow Cytometry Perm Buffer (10X) is provided as a concentrate which, when diluted with distilled water to a 1X solution, provides best results in intracellular staining protocols for cytokines and other cytoplasmic antigens, by maintaining membrane permeabilization throughout staining and wash steps. The Flow Cytometry Perm Buffer is formulated for optimal resolution and low background when used in fluorophore-labeled antibody staining protocols, followed by flow cytometric analysis.
