

Cell-permeable Apoptosis Inducer: Bak-BH3 Peptide
Synthetic Peptide
Catalog # SP1030a**Specification**

Cell-permeable Apoptosis Inducer: Bak-BH3 Peptide - Product InformationPrimary Accession
Sequence[Q16611](#)
RQIKIWFQNRRMKWKKMGQVGRQLAIIGDDIN
RRYDS**Cell-permeable Apoptosis Inducer: Bak-BH3 Peptide - Additional Information****Gene ID** 578**Other Names**

Bcl-2 homologous antagonist/killer, Apoptosis regulator BAK, Bcl-2-like protein 7, Bcl2-L-7, BAK1, BAK, BCL2L7, CDN1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Cell-permeable Apoptosis Inducer: Bak-BH3 Peptide - Protein Information**Name** BAK1**Synonyms** BAK, BCL2L7, CDN1**Function**

Plays a role in the mitochondrial apoptotic process. Upon arrival of cell death signals, promotes mitochondrial outer membrane (MOM) permeabilization by oligomerizing to form pores within the MOM. This releases apoptogenic factors into the cytosol, including cytochrome c, promoting the activation of caspase 9 which in turn processes and activates the effector caspases.

Cellular Location

Mitochondrion outer membrane; Single-pass membrane protein

Tissue Location

Expressed in a wide variety of tissues, with highest levels in the heart and skeletal muscle
