**Cholecystokinin (10-20) - Protein Information****Name** CCK**Function**

This peptide hormone induces gall bladder contraction and the release of pancreatic enzymes in the gut. Its function in the brain is not clear. Binding to CCK-A receptors stimulates amylase release from the pancreas, binding to CCK-B receptors stimulates gastric acid secretion.

**Cellular Location**

Secreted.

**Tissue Location**

Synthesized in both cerebral cortex and duodenal mucosa.
