

### **ACTH (1-14)**

Synthetic Peptide Catalog # SP3167b

## **Specification**

## **ACTH (1-14) - Product Information**

Primary Accession Sequence

P01196

NH2-SYSMEHFRWGKPVG-COOH

## **ACTH (1-14) - Additional Information**

#### **Other Names**

Corticotropin, Adrenocorticotropic hormone, ACTH, Melanotropin alpha, Alpha-MSH, Corticotropin-like intermediary peptide, CLIP, POMC

### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

## **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

### **ACTH (1-14) - Protein Information**

# **Name POMC**

### **Function**

Precursor protein for pituitary hormones that regulate stress and environmental adaptation. [Melanocyte-stimulating hormone alpha]: Anorexigenic peptide. Increases the pigmentation of skin by increasing melanin production in melanocytes.

### **Cellular Location**

Secreted {ECO:0000250|UniProtKB:P01193}. Note=Alpha-MSH and beta-endorphin are stored in separate granules in hypothalamic POMC neurons, suggesting that secretion may be under the control of different regulatory mechanisms {ECO:0000250|UniProtKB:P01193}
